Serious about Service since 1992

Putting Public Access Safety First

PUBLIC ACCESS STAIRCASES

100% Safe Public Access Staircases

System and public access staircases are a pre-requisite for large scale projects and events. Their seamless, versatile design makes them an ideal, safe solution for moving large numbers of people around all environments over a sustained period of time.

Designed to include compliant DDA warm touch handrails and anti-slip solid steel decks, our safe, child-friendly public access stairs direct site and pedestrian traffic to and from an area of safety.

Alltask personnel design and install numerous public access staircases every year for a range of scaffolding projects. They are constructed in line with the strictest safety requirements and each staircase includes cladding, double DDA warm touch handrails and magma-coated stair treads and landings.

Our team understands the safety critical nature of supplying public access bridges and public access staircases and we have experience in supplying access solutions for a wide range of different projects.

These include The Manor Station, Taplow Railway Station, Honeybourne Station, Barnes Bridge, Eco Park, Twickenham Station, and one of our latest projects is at Feltham for Station Bridge works.

The HAKI Public Access Stairs which we use meet the UK's most rigorous health and safety standards and comply with current regulations to ensure public safety. They are specifically designed for loads (up to 5.0 kN/m^2), while providing large clear spans with widths up to 2.5m.

The steel structure allows for high volumes of footfall and is also strong enough to last long periods of time, as well as having the ability to stand up to a range of weather conditions, without the need for repair or replacement of parts.

The robust nature of these public access stairs make them an ideal temporary access solution in public spaces where there is heavy footfall, such as railway stations, airports, sports stadiums and schools.

No matter how big the challenge, you can be guaranteed the best, safest, and most cost-effective public access solution.

Have total confidence that when you choose Alltask for your scaffolding project, the solutions we offer will be delivered on time - every time.

If you require a public access staircase, talk to us today so we can find out more about your project and what we can do.
